### Shark Auto Clicker Crack + Keygen For (LifeTime)

Shark Auto Clicker is a very easy to configure application that can repeat and perform mouse clicks and a number of user-defined actions. Although designed to do such a simple task, the main and the only window provided by the application lets you configure multiple parameters, all of which are designed to enhance the final process. For example, you can configure the mouse position by providing the screen coordinates, the number of clicks you wish to repeat (with a dedicated so-called "non-stop" option), the clicking interval and the type of program to be used, which can be either a web browser or a standard application. Of course, Shark Auto Clicker can simulate a typical left click, a right click or a double click, but additionally, it can also type text in a defined text field. The application also provides a so-called "Track list" that can be used to monitor the actions to be performed by the app once the "Start" button is pressed. Shark Auto Clicker works smoothly on Windows XP and doesn't slow down the operating system in any way, but the app fails to launch on Windows 7. Plus, it doesn't support 64-bit operating systems. Even if everything's so intuitive so beginners should have absolutely no problem when using it, the standard package doesn't include a help file, so in case you need more info on some of its features, there's no other option than to search the Internet. Overall, Shark Auto Clicker is a handy and easy to use mouse clicker that provides simple configuration options and a straightforward interface to serve its purpose.
