"JATC Just Another TourCreator" is an advanced panorama tour creator for Adobe® Photoshop®, After Effects®, Flash and Animate Pro® CS3. It can be used for creating complex pano tours with overlaying images, defining hotspots and creating SPi-V or FPP tours and ADR scenes in 3D. It can also be used as a quick way to create simple tours to be viewed with any panorama player like PurePlayer or PurePlayerPro. Besides creating tours the program provides a thumbnail gallery to quickly navigate through large pano galleries. JATC can be used to create previews of panos for PurePlayer, PurePlayerPro, or Flash Panorama Player FPP. JATC allows you to define hotspots for directional sound (only in SPi-V). You can also define a hotspot for fixed sound from the front. And you can define nadir, cap or flat images as hotspots for creating soundscapes or environmental audio. Create a tour to be viewed with PurePlayer or PurePlayerPro-Plugin or Flash Panorama Player FPP: Flash Panorama Player FPP After applying your tour to an image in Photoshop or After Effects, you can use the "Flash Panorama Player FPP" plugin to view the tour. This plugin allows you to view the tour in Flash Panorama Player. For the best performance you should change the Frame Rate of Flash Panorama Player to the same as of your video camera. You can install the plugin here: PurePlayer Plugin PurePlayer is a powerful tool for playing panoramas. It can be used as a standalone player. For the best performance and high quality result we recommend you to use the Plugin for Adobe® Photoshop®, After Effects® and/or Animate Pro® CS3. You can install the plugin here: PurePlayerPro Plugin PurePlayerPro is a powerful tool for playing panoramas. It can be used as a standalone player. For the best performance and high quality result we recommend you to use the Plugin for Adobe® Photoshop®, After Effects® and/or Animate Pro® CS3. You can install the plugin here: PurePlayer 2 Plugin PurePlayer 2 is a powerful tool for playing panoramas. It can be used as a standalone player. For the best performance and high quality result we recommend you to use the Plugin for Adobe® Photoshop®, After Effects® and/or An

☒ If you have data of your panos at your workstation, just copy this data into the output directory and "JATC Just Another TourCreator" will do the rest. You don't have to do anything further. ☒ If you have no data of your panos, you can create your panos with "JATC Just Another TourCreator" and then use the "JATC.Exporter" to get the data into the output directory. ☒ For creating tours with the menu item "New", you can chose between the panos you have at your workstation or you can choose the panos that you have exported with "JATC.Exporter". ☒ You can add/delete hotspots manually or you can use the hotspot-manager to create hotspots in image-coordinates. You can easily choose hotspots that should play sound, and that you want to be used for arrows. ☒ You can define hotspots that should not be shown. ☒ Use the map/floorplan-hotspot to define hotspots on the floorplan. ☒ Create a preview image for panos that are not exported with "JATC.Exporter". ☒ Generate an image-file for each pano that is exported by "JATC.Exporter". ☒ You can create a tour in a JATC project file (.jtc) and open the tour with PurePlayer or PurePlayerPro-Plugin or Flash Panorama Player. ☒ You can download the JATC-Plugin for PurePlayer or PurePlayerPro-Plugin (PurePlayerPro Plugin is a pre-version of the plugin) Install procedure: 1. Install PurePlayer for your computer 2. Get the plugin.rar-file from the JATC website 3. Install the plugin and restart PurePlayer After this installation, the menu item "New" in PurePlayer should be active. You can choose your own tours to export and create the tours by pressing the hotkey "Ctrl+N". I know that it's very easy to get the plugin and to install it. But I think it's important to know about the following: 1. You can try to install the plugin on another 1d6a3396d6

3D-maps of the status quo or problem location are usually not very useful if they are cut off by a building. While people may visit a building or a hotel all day, they usually don't do so frequently enough to describe a pano. If you do want to look into the building or rooms inside, you may need to create a pano tour around the building. Here are some key features of "JATC Just Another TourCreator": [Creation of complex pano tours or simple single pano](#) [Thumbnail gallery for quick navigation \(SPi-V and FPP\)](#) [Defining hotspots interactively](#) [Defining of sound spots for directional sound \(SPi-V and FPP\)](#) [Supporting point and polygonal hotspots](#) [Automatic hotspot creation](#) [Defining nadir/cap/flat image](#) [Defining map/floorplan](#) [Preview of tour/pano](#) [Create a tour to be viewed with PurePlayer or PurePlayerPro-Plugin SPi-V PTVviewer Flash Panorama Player FPP](#) [Supporting ADR scene creation for SPi-V](#) [Online help](#) [Save and load tour to/from JATC project file](#) Requirements: [.NET Framework 2.0](#) [PurePlayer plugin, and/or](#) [PurePlayerPro plugin, and/or](#) [SPi-V \(needs 1.4 in JATC 1.2\)](#) [PTViewer](#) [Flash Panorama Player](#) [Panos should be equirect or cylindrical](#) We are having a technical issue with our website and need you to urgently fix our calendar on the home page so that it displays the dates for 2018, 2019 and 2020. The calendar currently displays the dates for 2017. JATC - Just Another TourCreator Description: 3D-maps of the status quo or problem location are usually not very useful if they are cut off by a building. While people may visit a building or a hotel all day, they usually don't do so frequently enough to describe a pano. If you do want to look into the building or rooms inside, you may need to create a pano tour around the building.
