CommonCents (Latest)

Keeping a check on your spending can sometimes be difficult. This is where CommonCents comes in. With this software, you will have a complete control over your spending. This is made possible by helping you keep track of all your financial transactions, including both inbound and outbound transactions. The program also helps you manage your credit cards, mortgage, savings, and checking account to keep them in check. The software is very easy to use, and it does not require any special training. You can access the application through a web browser and start using it in just a few seconds. CommonCents Key Features: A simple yet powerful spending tracker With CommonCents, you can easily manage your finances. The tool allows you to organize your financial transactions in a very easy way. Keep track of your spending The software helps you keep a check on your spending by creating charts for your inbound and outbound transactions. With this in mind, you can also see a clear view of the current status of your spending. Create and manage multiple accounts CommonCents gives you the opportunity to easily create and manage more than one account. With this piece of software, you can import and export data effortlessly, make payments with the help of integrated direct connectivity, and create accounts at your financial institutions. Send reminders and notifications The software also lets you set up reminders and notifications. This will enable you to keep track of the changes in your finances and to avoid making late payments. See a clear account balance CommonCents helps you get a clear view of your financial situation. You can do so by creating balance reports, expenses reports, and income/expenses graphs. Backup your data and secure your privacy The tool comes with a backup manager that can easily backup your data and make sure you do not lose any important info. The backup manager lets you create passwords that protect your personal information. This program is

developed for the Mac OS X operating system and lets you keep track of your expenses, and see which ones go over budget. All you need to do is enter your credit card, or direct debit, number, and it will track your spending automatically. The app has a cash flow budgeting feature that allows you to see your net spend, and has a monthly budget. *If you're using an older version of Mac OS X than Yosemite 10.10.4, you might not have the option to open the cash flow budgeting feature in the application. Cash
