GDS Child Menu Crack + Patch With Serial Key

GDS Child Menu is a shell to your windows operating system. This shell works almost like the windows desktop, but is a advanced desktop-menu which contains buttons that can start any application and controll the process. GDS Child Menu has a Child-Safe Internet Browser (build-in). GDS Child Menu have a lot of advanced features to prevent any damage caused by childs playing withe the pc. We made this software as a way to handle childs usage of computers in a way, so you can feel safe while your small childs are playing. We hoped that Microsoft would have added a special CHILD account to Windows XP HOME, but..NOT.. Windows XP Home is NOT safe for small childs. Here is a short breefing of, what you can control with GDS Child Menu: ▢ Allowing only one application to run at a time.(optional) ▢ Disabling any key on the keyboard (including special windows keys and combinations). ▢ Control Logoff and Shutdown from the menu. ▢ Automatically generates statistics of the applications that runs trught the menu. (time spend, number of times started etc..) GDS Child Menu has been tested well by my own boy (he is 3◆ years old now) he have been using GDS Child Menu for the last year now on Windows XP Home. No problems, and the computer still runs! :) GDS Child Menu has been tested well by my own boy (he is 3◆ years old now) he have been using GDS Child Menu for the last year now on Windows XP Home. No problems, and the computer still runs! :) This can be your personal PC.It can make sure your PC is well away from viruses and cracks. You can use it to make your PC (windows 98/2000/XP) runs faster, safer and more stable. What makes your PC always keeps running when it is crashed or locked up? The reason is that your computer's RAM is working as hard as a normal workstation. Your computer is a complicated system which has many functions. But, if it is not functioning properly, it can not work as it should. Your PC may be slowed down, refused to start up, frozen, or it may crash all of a sudden. So, please do the following steps to check out how your PC works, and whether it is healthy. Every time your computer crashes, you

What's New In GDS Child Menu?
